TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, Rust

Frontend: React.js, Next.js, Tailwind CSS, Vite, Electron, HTML, CSS

Backend & Cloud: Node.js, Bun, Elysia, Express.js, REST APIs, PostgreSQL, Redis, RabbitMQ, MongoDB, Supabase, Cloudflare, AWS, Azure, GCP

Realtime: WebSockets, Yjs (CRDT), Durable Objects

AI/ML: LangChain, LangGraph, pgvector, Groq, Gemini, OpenAI, Deepgram, Vercel AI SDK

Tools: Git, Figma, Playwright

EXPERIENCE

Singularity Works

Aug 2025 - Present

Co-Founder and Lead Developer

Remote

- Co-founded a design and development studio; led end-to-end delivery for global clients across UI/UX design, frontend, and full-stack development
- Delivered 5 high-impact projects with a 4.8+ client rating and generated six-figure revenue within the first two months
- Translated ambiguous requirements into precise UX flows and production-ready systems, including clients with zero technical background

PROJECTS

Larity | *Tauri, TypeScript, Elysia, pgvector, Redis, Groq, Gemini*

[Link](#)

- Organizational memory and intelligence platform** - native desktop app (Tauri) for real-time meeting intelligence: dual-channel audio capture, speaker diarization via voice activity detection (zero enrollment, zero stored audio), and live contradiction detection via a four-tier LLM pipeline (pre-filter, Groq classification, pgvector semantic search, Gemini reasoning)
- Built post-meeting intelligence layer: decision and task extraction with versioned audit trails, knowledge graph with long-horizon vector memory, GitHub repo ingestion, calendar and email integration, automated document generation (contracts, proposals, SOWs)
- Delivered multi-user sessions, voice-first grounded Q and A assistant, and workload management with timeline prediction at an all-in cost of \$1.22 per meeting

Saltwise | *Next.js, TypeScript, Supabase, Groq, Firecrawl*

[Link](#)

- Prescription intelligence system** - maps branded drugs to safe generic alternatives at the salt level, reducing patient costs by 40 to 60 percent
- Implemented real-time pharmacy price aggregation by scraping 1mg and PharmEasy via Firecrawl with confidence-level tracking and caching
- Integrated large language models via Vercel AI SDK for prescription OCR, natural language search, and patient-friendly explanations with deterministic drug interaction safety logic

ACHIEVEMENTS

- 1st Place - MLH HackByte 4.0** (Major League Hacking global hackathon)
- 1st Place - Summer of Codefest 2025**
- 4-Star Python** on HackerRank; open source contributor to AsyncAPI and LangChain

EDUCATION

VIT Bhopal University

Sep 2023 - Present

Bachelor of Technology, Computer Science and Engineering

Bhopal, MP

CERTIFICATIONS

- IBM: Frontend Development with React, Backend Development with Node.js, Cloud Computing, Python for Data Science and AI
- NPTEL: Introduction to Machine Learning | Introduction to Japanese Language and Culture
