TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, C++, Rust
Frontend: React.js, Next.js, Tailwind CSS, Vite, Electron, Tauri, HTML, CSS
Backend, Databases & Realtime: Node.js, Bun, Elysia, Express.js, REST APIs, PostgreSQL, MongoDB, Prisma, Redis, RabbitMQ, BullMQ, WebSockets, Yjs (CRDT)
Cloud, DevOps & Tools: AWS, Cloudflare Pages, Vercel, GitHub Actions, Durable Objects, Git, Figma, Puppeteer
AI/ML: LangChain, pgvector, Groq, Gemini, OpenAI, Deepgram, Vercel AI SDK

ACHIEVEMENTS

- 1st Place – MLH HackByte 4.0, a Major League Hacking global hackathon (48-hour team build)
- 1st Place – Summer of Codefest 2025, national-level hackathon
- CodeForces: 1307 rating; open source contributor to AsyncAPI

EXPERIENCE

Singularity Works *Aug 2025 – Aug 2026*
Full Stack Developer *Remote*

- Co-founded and own full-stack projects end-to-end, leveraging Agile development methodologies from client requirements gathering through iterative delivery
- Collaborated within a small cross-functional team to build and ship 3 custom e-commerce frontends for global client projects, owning UI/UX design through frontend implementation
- Optimized WebGL rendering on company site using geometry instancing, LOD, and lazy loading; reduced load time by 21.87% (3.1s → 2.42s) and raised frame rate from 54 to 90+ FPS, verified via Chrome DevTools

PROJECTS

Larity | *Tauri, TypeScript, Elysia, pgvector, BullMQ, Prisma, Redis, Google AI Studio* larity.itssingularity.com

- Built a four-tier contradiction detection pipeline – pre-filter, Groq intent/escalation triage, pgvector cross-utterance retrieval, Gemini severity reasoning; achieving 92% agreement with human reviewers (5–10% false positive rate) at sub-2s latency, $1.22 per 1-hour meeting
- Engineered zero-enrollment speaker attribution via dual-channel audio capture with clock-drift normalization across distributed clients, no stored audio
- Built a post-meeting knowledge graph with vector memory powering a Q&A assistant across meeting history
- Grew to 332 active users through cold outreach and technical content distribution, driving organic adoption pre-general-availability

Saltwise | *Next.js, TypeScript, Supabase (PostgreSQL), Groq, Firecrawl* saltwise.vercel.app

- Built a prescription intelligence system to improve healthcare affordability, matching branded drugs to generic equivalents by active pharmaceutical ingredient and surfacing 40–60% cost reductions across compared drug pairs
- Aggregated real-time pharmacy pricing across 1mg and PharmEasy via Firecrawl scraping, with caching to keep price data current
- Used deterministic logic (not LLM inference) for the drug-interaction safety check to eliminate hallucination risk on a safety-critical path, reserving LLMs for OCR, search, and patient-facing explanations

EDUCATION

Vellore Institute of Technology *Sep 2023 – Sep 2027*
Bachelor of Technology, Computer Science and Engineering *8.32 GPA*

CERTIFICATIONS

- IBM: Frontend Development with React, Backend Development with Node.js, Python for Data Science and AI
- Google: Bits and Bytes of Computer Networks
- Anthropic: Introduction to Model Context Protocol
- NPTEL: Introduction to Machine Learning | Introduction to Japanese Language and Culture
